<https://dipanshu-verma.github.io/>

Full Stack MERN Developer with 3 years of experience building production-grade e-commerce platforms, MLM systems, and high-frequency trading applications. Expertise in React, Next.js, Node.js, and MySQL with proven track record of implementing payment integrations, real-time notification systems, and database optimization. Strong problem-solving foundation with 250+ DSA problems solved. Skilled in deploying scalable applications using AWS and CI/CD pipelines.

SKILLS

Frontend: JavaScript, Material-UI, Next.js, React, Redux, Tailwind CSS

Backend: Express.js, GraphQL, JWT / OAuth, Nest.js, Node.js, REST APIs, Socket.io, TypeScript

Database: MongoDB, MySQL, Redis, Sequelize

Cloud/DevOps: AWS (EC2, S3), CI/CD, Docker, GitHub Actions, Kubernetes, Nginx, PM2

Other: Agile, Firebase, Git, Java, microservices, Razorpay

WORK EXPERIENCE

Techfrigate • Jodhpur • 06/2024 - Present

Full Stack Developer • Tech Lead • Full-time

- Developed and led a team of 3 developers on Falcon Furnish, a furniture e-commerce platform using microservices architecture with 3 Next.js apps: customer portal, vendor dashboard, and admin panel, serving 500+ products across 50+ vendors
- Built Naturavive World MLM platform for Nigeria/Ghana markets with binary tree commission structure and multi-currency wallet system
- Integrated RazorpayX payment gateway and Shiprocket API for multi-carrier shipping, reducing manual processing by 70%
- Mentored 3 junior developers and conducted a 2-month full-stack training program for students at Jodhpur Institute of Engineering & Technology, covering React, Node.js, and database fundamentals
- Built guest cart/wishlist improving checkout conversion by 20% and admin analytics dashboard with sales and vendor metrics
- Built a healthcare management system with ABDM integration, FHIR-compliant APIs, SNOMED CT, appointment scheduling, video consultations, and prescription management, serving multiple healthcare providers through multi-tenant architecture

VP Algo • Mumbai • 06/2023 - 06/2024

Full Stack Developer

- Developed a high-frequency trading platform integrating multiple broker APIs for real-time market data processing, handling 10k+ daily transactions and serving 5k+ active users
- Implemented Redis-based rate limiting and caching mechanisms, reducing API response time by 35% and blocking 2k+ malicious requests daily
- Developed real-time WebSocket streaming for live market data updates, supporting 500+ concurrent user connections with sub-second latency

EDUCATION

Full Stack Web Development

Masai School • Bengaluru • 09/2022 - 05/2023

Bachelor of science in Mathematics

Maharaja Ganga Singh University • Bikaner, Rajasthan • 03/2017 - 09/2020
