Full Stack MERN Developer and Tech Lead with 3 years of experience building production-grade e-commerce platforms, MLM systems, and high-frequency trading applications. Expertise in React, Next.js, Node.js, and MySQL with proven track record of implementing payment integrations, real-time systems, and database optimization. Leverages AI-augmented development workflows using Claude, GitHub Copilot, and prompt engineering to accelerate delivery and code quality. Strong problem-solving foundation with 250+ DSA problems solved. Skilled in deploying scalable applications using AWS and CI/CD pipelines.

SKILLS

Frontend: JavaScript, Material-UI, Next.js, React, Redux, Tailwind CSS

Backend: Express.js, GraphQL, JWT / OAuth, Nest.js, Node.js, Python, REST APIs, Socket.io, TypeScript

Database: MongoDB, MySQL, Pinecone (Vector DB), Redis, Sequelize

Cloud/DevOps: AWS (EC2, S3), CI/CD, Docker, GitHub Actions, Kubernetes, Nginx, PM2

AI Tools: Antigravity, ChatGPT, Claude, GitHub Copilot, Prompt Engineering

Other: Agile, Firebase, Git, Java, microservices, Razorpay

WORK EXPERIENCE

Techfrigate • Jodhpur • 06/2024 - Present

Full Stack Developer • Tech Lead • Full-time

- Led team of 3 on Falcon Furnish, a multi-vendor e-commerce platform with 3 Next.js apps serving 100+ products, 10+ vendors. Used AI-assisted development, reducing dev time by 40%
- Built Naturavive World MLM platform for Nigeria/Ghana with binary tree commission and multi-currency wallet system
- Integrated RazorpayX payments and Shiprocket shipping API, reducing manual processing by 70%
- Mentored 3 junior developers and conducted 2-month full-stack training at Jodhpur Institute of Engineering & Technology
- Built guest cart/wishlist improving checkout conversion by 20% and analytics dashboard with AI-powered search and recommendations using Python and Vector DB (Pinecone) for semantic product discovery
- Built healthcare system with ABDM, FHIR APIs, SNOMED CT, video consultations, and prescription management using AI-powered code review workflows
- Leveraged AI tools (Claude, GitHub Copilot) and Python scripting for documentation, code optimization, and prompt engineering across all projects

VP Algo • Mumbai • 06/2023 - 06/2024

Full Stack Developer

- Developed a high-frequency trading platform integrating multiple broker APIs for real-time market data processing, handling 5k+ daily transactions and serving 2k+ active users
- Implemented Redis-based rate limiting and caching mechanisms, reducing API response time by 35% and blocking 2k+ malicious requests daily
- Developed real-time WebSocket streaming for live market data updates, supporting 500+ concurrent user connections with sub-second latency

EDUCATION

Full Stack Web Development

Masai School • Bengaluru • 09/2022 - 05/2023

Bachelor of science in Mathematics

Maharaja Ganga Singh University • Bikaner, Rajasthan • 03/2017 - 09/2020
